

Cytoskeleton Club

Cytoskeletal Club is established with the aim of bringing together the I2BC cytoskeletal community to meet, hear informal talks and exchange ideas.

This is not a private club. Talks are open to everyone, so come along!

Cytoskeletal Club meets once a month, every second Tuesday morning at 11:30 am in the library of Building 34

Find the seminar list here : <http://www.i2bc.paris-saclay.fr/spip.php?article1359>

The Club rules ...

01 | *The speaker (PIs, Post-doc, PhD, master student, Engineers) prepares a 30 minute presentation in english. Please also include your negative, unexplained, puzzling, preliminary findings and current troubles and how you solved problems that you reported last time so that everybody can give feedback and learn from each other.*

02 | *Disruption of the speaker with questions/suggestions from the audience (other than PIs) is positively encouraged. PIs are only allowed to ask questions after the talk and after the first question has been asked by a student or postdoc.*

03 | *Take part actively: Ask, when you don't understand something. Ask if you don't know how an experiment was done. Ask what it means. You don't need to have a PhD to ask questions.*

04 | *Cytoskeleton Club is like Fight Club... please don't talk to outsiders about unpublished results that you see at these meetings.*

05 | *At the end of each meeting, the next speaker will be identified*

To be informed of reminders, subscribe to the "ClubCytoskeleton" mailing list
For that, please contact directly : Christophe Le Clainche or Julie Ménétrety
